About RESPIDART

[RespiDART](#) is a new addition to the DART series of healthcare conferences and is focused on drug development challenges and advances for respiratory virus threats to human health. These viruses include long-standing threats such as RSV and influenza, as well as recent outbreaks of MERS-coV, parainfluenza virus, and metapneumovirus. This meeting will focus on advances in therapeutics, vaccinology, virus/host interactions and enzymology, and new study models in development. By bringing together world leaders and key opinion holders, RespiDART 2018 aims to address the latest challenges in vaccine and drug development against respiratory viruses.

About IMV

IMV Inc., formerly Immunovaccine Inc., is a clinical stage biopharmaceutical company dedicated to making immunotherapy more effective, more broadly applicable, and more widely available to people facing cancer and other serious diseases. IMV is pioneering a new class of immunotherapies based on the Company's proprietary drug delivery platform. This patented technology leverages a novel mechanism of action that enables the programming of immune cells *in vivo*, which are aimed at generating powerful new synthetic therapeutic capabilities. IMV's lead candidate, DPX-Survivac, is a T cell-activating immunotherapy that combines the utility of the platform with a target: survivin. IMV is currently assessing DPX-Survivac as a combination therapy in multiple clinical studies with Incyte and Merck. Connect at www.imv-inc.com.
