- Conference ID#: 6192578
- A live audio webcast and presentation will be available via this link, or by pasting this URL in an internet browser: <https://edge.media-server.com/m6/p/5uokxhky>

About ESMO I-O

The ESMO Immuno-Oncology Congress works to increase the overall understanding of the potential of immunotherapy and its implications for clinical practice. The Congress keeps oncologists up-to-date in this rapidly evolving field and is the ideal platform for all

interested stakeholders. From the basics of immunotherapies to the latest research results; from understanding different treatment options to management of toxicities and interpretation of new data, the Congress builds the European community of immuno-oncology stakeholders.

About IMV

IMV Inc., formerly Immunovaccine Inc., is a clinical stage biopharmaceutical company dedicated to making immunotherapy more effective, more broadly applicable, and more widely available to people facing cancer and other serious diseases. IMV is pioneering a new class of immunotherapies based on the Company's proprietary drug delivery platform. This patented technology leverages a novel mechanism of action that enables the programming of immune cells *in vivo*, which are aimed at generating powerful new synthetic therapeutic capabilities. IMV's lead candidate, DPX-Survivac, is a T cell-activating immunotherapy that combines the utility of the platform with a target: survivin. IMV is currently assessing DPX-Survivac as a combination therapy in multiple clinical studies with Incyte and Merck. Connect at www.imv-inc.com.
